Web Technologies: HTML5, CSS3, JavaScript
Frameworks: Spring, Spring Boot
Cloud and Tools: AWS (EC2, S3, IAM), Git, GitHub, VS Code
Core Concepts: Object-Oriented Programming (OOP), Data Structures and Algorithms (DSA)
Data Science: Machine Learning

Experience

Web Development Intern September 2025 – November 2025
EuphoriaGenx

- Developed responsive web pages using HTML, CSS, and JavaScript.
- Collaborated with team members to improve user interfaces and resolve application bugs.
- Tested web applications across devices and browsers and contributed to code optimization and feature development.

Projects

Movie Ticket Booking Application *MERN Stack*

- Developed a full-stack movie ticket booking application with movie browsing, show selection, seat booking, and booking confirmation interfaces.
- Built REST APIs using Node.js and Express.js for authentication and booking management; used MongoDB to manage application data.

Detecting Rumors in Social Networks using Metaheuristic Algorithms *Python, NLP, Scikit-learn*

- Developed a machine learning system to classify social media posts as rumor or non-rumor using text preprocessing and feature extraction, including TF-IDF and Word2Vec.
- Used SVM for classification and Ant Colony Optimization for feature selection; evaluated results with Accuracy, Precision, Recall, and F1-Score.
